## THIRD QUARTERLY RESULTS ANNOUNCEMENT FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2018

# CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Pursuant to a group reorganisation (the "Reorganisation") to rationalise the structure of the Group in preparation for the listing of the Company's shares on the GEM of the Stock Exchange, the Company became the holding company of the Group on 31 October 2016. Details of the Reorganisation are set out in the section headed "History, Development and Reorganisation" in the Prospectus of the Company dated 30 June 2018 (the "Prospectus"). The Company's immediate and ultimate holding company is Vigorous King Limited, a company incorporated in the British Virgin Islands and the ultimate controlling party is Mr. Yu Pak Lun Larry as of the date of this announcement.

#### 2. BASIS OF PREPARATION AND PRESENTATION

The quarterly condensed consolidated financial statements for the nine months ended 30 September 2018 has been prepared in accordance with Hong Kong Accounting Standard 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") and the applicable disclosure provisions of the Rules Governing the Listing of Securities on GEM of The Stock Exchange of Hong Kong Limited (the "GEM Listing Rules"). The principal accounting policies used in preparing the unaudited quarterly condensed consolidated financial statements are consistent with those adopted in the preparation of the Group's annual financial statements for the year ended 31 December 2017.

The unaudited quarterly condensed consolidated financial statements have been prepared under the historical cost basis and presented in Hong Kong dollars ("HK\$"). All values are rounded to the nearest thousand except when otherwise indicated. The unaudited quarterly condensed consolidated financial statements have not been audited by the Company's auditor, but have been reviewed by the Company's audit committee.

#### 3. ADOPTION OF HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs")

The HKICPA has issued a number of new HKFRSs and amendments to HKFRSs that become effective for the first time for the current accounting period. Of these, the followings are relevant to the Group's condensed consolidated financial statements:

HKFRS 9 Financial Instruments

HKFRS 15 Revenue from Contracts with Customers

The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period, except for the amendments to HKFRS 9 "Prepayment features with negative compensation" which have been adopted at the same time as HKFRS 9.

Further details of these changes are set out in sub-sections (a) and (b) of this note.

For the nine months ended 30 September 2018

### 3. ADOPTION OF HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") (CONTINUED)

### (a) HKFRS 9 "Financial instruments", including the amendments to HKFRS 9 "Prepayment features with negative compensation"

HKFRS 9 replaced HKAS 39 "Financial instruments: recognition and measurement". HKFRS 9 sets out the requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items.

For impairment of financial assets, HKFRS 9 has adopted an expected credit loss ("ECL") model whereas HKAS 39 adopted an incurred loss model. The ECL requires an ongoing assessment and measurement of credit risk associated with a financial asset and therefore expected credit losses are expected to be recognised earlier as compared to the incurred loss model under HKAS 39. The directors of the Company concluded that the area that the Group's financial position and financial results may be impacted by HKFRS 9 is about recognition and measurement of expected credit losses.

Specifically, loss allowances for trade and other receivables and contract assets are always measured at an amount equal to lifetime ECLs. ECLs on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors and information available to the Group at the reporting date about current conditions and forecast of future economic conditions.

In assessing the credit risk of a financial asset, the Group considers both quantitative and qualitative information that is reasonable and supportable that is available without undue cost or effort, including risk of default, historical and forward-looking information e.g. the general market, economic or legal environment that may have an adverse effect on the recoverability of trade debts.

Based on the specified transitional provisions set out in HKFRS 9, the directors of the Company have decided not to restate the comparative figures. Any cumulative adjustments are recognised against the opening retained profits as of 1 January 2018. The directors of the Company concluded that the loss allowance as at 1 January 2018 was insignificant.

#### (b) HKFRS 15 "Revenue from contracts with customers"

HKFRS 15 establishes a comprehensive framework for recognising and measuring revenue and some costs from contracts with customers. HKFRS 15 replaced HKAS 18 "Revenue", which covered revenue arising from sale of goods and rendering of services, and HKAS 11 "Construction contracts" which specified the accounting for revenue and costs from construction contracts.

For the nine months ended 30 September 2018

### 3. ADOPTION OF HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") (CONTINUED)

#### (b) HKFRS 15 "Revenue from contracts with customers" (Continued)

Based on the specified transitional provision set out in HKFRS 15, the directors of Company had decided to apply the modified retrospective approach. The directors of the Company have assessed and concluded that there was no adjustment required to be made on the Group's retained profits at 1 January 2018. Further details of the nature and effect of the changes on application of HKFRS 15 are set out below:

#### (i) Timing of revenue recognition

Previously, revenue arising from contracts for IT solutions services was recognised using the percentage of completion, measured by reference to the proportion that contract costs incurred for work performed to date compared to the estimated total budgeted contracts costs, adjusted for the effects of costs incurred that do not reflect the work performed by the Group. However, where the contracts for IT solutions do not require the Group to carry out installation, testing and integration works, revenue is recognised upon transfer of the significant risks and rewards of ownership of the IT solutions to the customers. Revenue from IT maintenance and support services was recognised over time when the services were rendered.

Under HKFRS 15, revenue is recognised when the customer obtains control of the promised good or service in the contract. This may be at a single point in time or over a period of time. HKFRS 15 identifies the following three situations in which control of the promised good or service is regarded as being transferred over time:

- A. When the customer simultaneously receives and consumes the benefits provided by the entity's performance, as the entity performs;
- B. When the entity's performance creates or enhances an asset (for example work in progress) that the customer controls as the asset is created or enhanced; and
- C. When the entity's performance does not create an asset with an alternative use to the entity and the entity has an enforceable right to payment for performance completed to date.

If the contract terms and the entity's activities do not fall into any of these 3 situations, then, under HKFRS 15, the entity recognises revenue at a single point in time, being when control of that good or service has passed. Transfer of risks and rewards of ownership is only one of the indicators that is considered in determining when the transfer of control occurs.

The adoption of HKFRS 15 does not have a significant impact on when the Group recognises revenue from IT solutions and IT maintenance and support services. Based on the management's assessment, revenue arising from contracts for IT infrastructure solutions and IT development solutions which involved just sales of hardwares/softwares are recognised at a point in time. Revenue arising from IT infrastructure solutions and IT development solutions which also involved provision of installation, testing and integration works which the management assessed and concluded that there are significant integration activities, are recognised over time. Revenue arising from IT maintenance and support services is recognised over time. Also, in respect of transactions where the related consideration is concluded to be recognised as revenue over time, the Group has determined that an input method is an appropriate method to measure the Group's progress towards complete satisfaction of a performance obligation satisfied over time, which is based on costs incurred compared to total budgeted costs when applying HKFRS 15.

For the nine months ended 30 September 2018

#### 4. SEGMENT INFORMATION

The chief operating decision makers are identified as the executive directors of the Company. The Group has identified its operating segment based on the regular internal financial information reported to the Company's executive directors for their decisions about resources allocation and review of performance. For the reporting period, the executive directors have considered the only operating segment of the Group is the provision of IT infrastructure solutions services, IT development solutions services and IT maintenance and support services.

#### PROSPECTS AND OUTLOOK

For the year ending 31 December 2018 ("FY2018"), while we maintain our target to record relatively stable revenue, a number of factors could come into play that may affect our performance. Certain macro issues may further dominate in second half of FY2018 and affect our short term overall performance, such as unstable fluctuation in the Hong Kong stock and property market, that have led to lower orders and fulfillments by the Company during FY2018.

Further, we believe that the ongoing trade dispute between the US and China may further escalate geopolitical tensions, potentially resulting in negative economic impact worldwide. While in the short term, there is no easy way out for global businesses in China (including our major clients in Hong Kong that we are serving with), we are working actively towards mitigating any potential effects in the long term, such as strengthening our marketing efforts.

We will closely monitor the impact of the macro issues and trade dispute on our performance, and will plan and set our strategies cautiously to manage these factors with the aim to deliver the best possible results to our shareholders.
